

Outdoor Horn Speaker

The all-weather IP broadcasting loudspeaker column adopts a full-frequency waterproof loudspeaker (waterproof, heat-resistant, salt-resistant, and sulfur -resistant), with clear and bright sound, ultra-high sensitivity appearance, solid and durable, easy to install,and has the most authentic amplification and restoration effect onhuman voice and music. It is suitable for hospitals, quarantine hotels, smart streetlights, station halls, gymnasiums, playgrounds, docks, airports and other occasions.

Product Functions

- ☑ Networking of LAN
- ☑ Supports video linkage (optional)
- ☑ Supports third-party audio source input (optional)
- ☑ Supports local storage chips (optional)
- ☑ Supports scheduled broadcasting
- ☑ Supports zoned broadcasting
- ☑ Supports voice shout-out broadcasting, file broadcasting
- ☑ Supports TTS (Text-To-Speech) to speech broadcasting
- ☑ High-quality audio speakers
- ☑ IP network architecture, capable of crossing subnets and routers
- ☑ Supports mobile app broadcasting

Product Parameters

Processor:	High-performance embedded SOC processor
Operating System:	Embedded LINUX operating system
Rated Power:	30W
Audio Format:	G.711A/U , OPUS
Audio Quality:	Professional echo cancellation and noise suppression
Network Protocol:	TCP/IP 、 DNP
Network Port:	10/100M adaptive Ethernet port
Power Supply:	DC 12V or POE
Appearance Dimensions:	240MM*220MM*160MM
Power Consumption:	≤30W
Operating Temperature:	- 30°C~75°C
