Management Host ——DH-G08

Management Host DH-G08 use CortexA55 1.8G*quad-core design,support HD voice, The originaleco -logical Android 11.10 system design supports application expansion based on the openAndroid platform. The device uses a 8.0 inch 1280× 800IPS high-definition resolution display,the capacitive screen with multi-touch. Supports RJ45 wired network, and meets variousnetwork connections. Input method.

This product is an alarm management host applied in one-key alarm broadcasting systems. It can be used with alarm server software or independently in offline mode, supporting both LAN and Internet usage. It features multiple functions, including two-way voice intercom, voice broadcasting, automatic queuing of multiple alarms, audio-video recording, recording playback, and alarm record storage.

HD voice

8-inch IPS screen

Dual gigabit network interface

Audio and video conference

Earphone

Call recording

POE power supply

Product highlight

Good user experience

The appearance is simple and generous, equipped with 8 inch HD display, with color display, clear operation interface design, visual effect is better. At the same time, DH-G08 back buckle bracket design, perfect fit with the desktop, easy to use、firm.

Powerful & good expansibility

Built-in 2.4G/5G Wifi module, 2 double gigabit network ports, make the network connection more flexible and convenient. One PSTN port, which can be connected to a telephone line at the same time, supports 4G plug-in phones to meet customer requirements in different scenarios. With USB interface, can be extended to store call recording. Support HDMI interface, POE power supply, Type-C interface and power cable power supply, a variety of charging methods to meet customer needs.

HD AUDIO

It has professional audio processing technology to make the sound quality clearer, 3W full frequency speaker and super large sound cavity, bringing users a high-quality hands-free calling experience. The 5 million high-definition camera can be blocked and the angle of the camera can be adjusted, and it supports up to 1080P video calls. By combining advanced algorithms with rich experience in the network, it can be used even under extremely challenging network conditions. Can provide excellent video quality.

Secure Deployment Configuration Protocol

Users do not need to manually configure and upgrade the phone, just need to power on and connect to the Internet, and the phone can be automatically deployed, saving a lot of time and cost.

Technical Parameters

AUDIO

- HD Voice Microphone/Speaker (Handset/Hands-free)
- Excellent Echo Cancellation Technology (ECT)
- Receiver with intelligent noise reduction ANC Technology
- Audio codec: GSM,PCMA,
- Video codec: H264,1080P 30fpbs
- Full duplex hands-free

Phone Features

- Ringer selection
- Set date time manually or automatically
- Built-in WIFI:
  -Standard: IEE 802.11 b/g/n
  -Band: 2.4GHz/5.0GHz
- Basic function: received/hand up/call mute

Others

- Call completion, call recording
- Server-based recording function
- Power led indicator

Other physical

- Color: Black
- Power adapter: 12V/1A DC input
- Relative humidity: 10%~90% No Condensing
  Operation temperature: -10~50°C

Package Contents

- Package list:
  - phone /handset / bracket/ camera /
    power adapter/line cord/coil cord/user manua
- N.W/CTN: 6.4kg
- G.W/CTN: 7kg
- GIFT BOX SIZE: 345*275*128mm
- MASTER CARTON SIZE: 534*361*297mm

Phone interface

- Intuitive user interface
- support Chinese/English or other languages

Interface

- 2*RJ45 double Gigabit network port
- POE IEE 802.3af
- 1*TF card interface
- 1*Type-C interface
- 1*PSTN interface
- 1* Power interface
- 1*RJ9(4P4C) handle interface
- 1*HDMI interface
- 1*SIM card interface

Management

- Online APP update, WEB terminal offline update
- Reset to factory, reboot

Network and Security

- IP address allocation mode: static/dynamic
- Support HTTP web server
- Time and date synchronization using SNTP

Product Functions

- Support one-key answer and hang-up functions.
- Support gooseneck microphone and hands-free calling.
- Support voice broadcasting of IP intercom names.
- Support full-duplex two-way voice intercom.
- Support audio-video recording function of the manage ment host (requires TF card insertion).
- Support audio-video playback and power amplifier functions on the management host.
- Support remote control of door opening and closing.
- Support real-time voice broadcasting and file broadcasting.
- Support broadcasting to different groups of intercoms.
- Support one-key alarm broadcasting, such as fire broadcasting.
- Support automatic voice broadcasting when intercoms are offline.
- Support setting different ringtones for different buttons of multi -button intercoms.
- Support saving 2,000 alarm records.
- Support active monitoring and listening to intercoms by the management host.
- Built-in WiFi module, supporting WiFi networking.
- Support HDMI output for connecting to large-screen displays. 8-inch, 1280*800 pixel IPS high-definition touchscreen.
